

PLAYER DEVELOPMENT

Legacy Leadership

24 players graduated from the newly evolved GPA Legacy Leadership program. Building on the success of previous years, the GPA Legacy Leadership Programme continues to provide GPA members with a unique space to grow as leaders both on and off the field.

Combining immersive workshops, leadership development centres, one-to-one coaching and valuable peer learning, the programme offers a challenging yet supportive environment that is tailored to the realities of elite sport. Participants left with new perspectives, stronger leadership skills and practical tools they can apply throughout their sporting, professional and personal lives.

PLAYER DEVELOPMENT

Emerging Leaders

This year marked the launch of the GPA's first Emerging Leaders Programme, bringing together 8 ambitious players aged between 21 -25 committed to developing as leaders beyond the pitch. Over the course of the programme, participants took part in immersive workshops, one-to-one coaching and peer learning, building greater self-awareness, adaptability and practical leadership skills.

The programme created a unique space for players to challenge themselves, learn from one another and explore how they can make a positive impact in their careers, communities and the wider game. The success of this inaugural programme has laid a strong foundation for the future, with the next generation of emerging leaders already beginning to take shape.
